

GPA BASED INTEGRATED MINE MANAGEMENT SYSTEM

MINETM MASTER

Mine Master is an integrated GPS based truck dispatch system. It is a one-stop solution to manage all your mining operations from a remote location. This is an indigenous solution with combination of Hardware & Software which facilitates mining managers to concentrate on effective mining instead of patrolling and policing the Mine.

- ◆ Grade Control & Dispatch
- ◆ Health Monitoring of Fleet
- ◆ Tyre Health Monitoring
- ◆ Schedule Mine Planning Periodically
- ◆ Dynamic Scheduling of fleet
- ◆ Monitor Vehicle location Remotely
- ◆ Instantaneous KPI Monitoring
- ◆ Monitor Fleet movement and track events like
- ◆ Vehicle Starting, Stopping and Speeding or movement outside of a pre-defined area.
- ◆ Monitor sensors like low oil pressure.
- ◆ View your mining operations and productivity factors through dash board screens, On-line maps, charts and Dictional graphs and status reports.

- ◆ Centralize and simplify the management of On-site operations.
- ◆ Improves fleet productivity and life cycle.
- ◆ Optimizing vehicle mangement.
- ◆ Reducing maintenance fuel cost by tracking machine hours, Mileage, Idle time, Working time for preventive maintenance.
- ◆ Integration of all KPI's to proprietary ERP and ready to use modules to integrate to SAP.

Instant information @ your desk

- ◆ Fuel position
- ◆ fuel productivity
- ◆ fuel Health
